

2023 State of Broadband SCKLS Public Libraries

LARRY PAPERFUSS, DIRECTOR OF IT
SOUTH CENTRAL KANSAS LIBRARY SYSTEM

LARRY@SCKLS.INFO

(800) 234-0529, EXT. 160

"The library is like a candy store where everything is free."

~ Jamie Ford, American author – from the novel, *Songs of Willow Frost*

FCC Broadband Definition Over the Years

1996, 200 Kbps downstream, 200 Kbps upstream

2010, changed to: 4 Mbps downstream, 1 Mbps upstream

2015, changed to 25 Mbps downstream, 3 Mbps upstream (Remains definition today)

[HTTPS://BROADBANDNOW.COM/REPORT/FCC-BROADBAND-DEFINITION](https://broadbandnow.com/report/fcc-broadband-definition)

The FCC is Considering 100 Mbps downstream, 20 Mbps upstream

FCC recent Notice of Inquiry (NOI) October 25, 2023 indicates considering 100 Mbps downstream, and 20 Mbps upstream as the new standard: *“we seek comment on the appropriate standards for evaluating the physical deployment of fixed and mobile broadband service, including proposing to increase our benchmark for fixed broadband download speed to 100 megabits per second (Mbps) and the upload speed to 20 Mbps.”*

PAGE 4, 1. FIXED BROADBAND SERVICE – 10. SPEED

What We Have Seen

The Coronavirus closed many libraries for a time, but digital service needs (connectivity speeds) increased.

Increased need for WiFi access outside of the library building.

Increased need for videoconferencing use by staff for services and training.

A need for higher speeds has remained and the current trend at member sites has been migration to fiber and increased speeds.

“UNLESS WE ADDRESS OUR UNSERVED BROADBAND CHALLENGES IN OUR URBAN, SUBURBAN, AND RURAL AREAS, WE WILL NOT HAVE EQUITABLE ACCESS FOR ALL AND ACHIEVE THE ECONOMIC RECOVERY THAT WE NEED.”

~ NED LAMONT - AMERICAN BUSINESSMAN AND POLITICIAN SERVING SINCE JANUARY 2019 AS THE 89TH GOVERNOR OF CONNECTICUT

Fiber Broadband Projects

Multiple ISP's (Internet Service Providers) began installing fiber as part of various broadband grants, such as FCC's Rural Broadband (Rural Digital Opportunity Fund), USDA's ReConnect Program, KDOT's Broadband Acceleration Grant Program (BAG) and other broadband funding programs.

“RURAL COMMUNITIES AND OUR NATION'S ECONOMY ALSO STAND TO BENEFIT FROM BROADBAND EXPANSION. RURAL SCHOOLS CAN EXPAND THE QUANTITY AND QUALITY OF EDUCATIONAL PROGRAMMING. RURAL COMMUNITIES CAN ATTRACT BUSINESSES AND INVESTMENT.”

~ ABIGAIL SPANBERGER – U.S. REPRESENTATIVE FROM VIRGINIA'S 7TH CONGRESSIONAL DISTRICT

A Snapshot of Broadband at SCKLS Public Libraries in 2023

12 Counties with 72 Public Libraries + 6 Branches (Wichita Public Library)

13 Gateway | 17 Linking | 19 Service Center I | 13 Service Center II

7 Major Service Center I | 2 Major Service Center II | 1 Major Resource Center with six branches

19 ISP's (Internet Service Providers)

4 Connection Types (cable, DSL, fiber, wireless)

Average Downstream Speed of 78 sites = 233 Mbps

Average Upstream Speed of 78 sites = 145 Mbps

“THE RISE OF BROADBAND AND GROWING UBIQUITY OF INTERNET ACCESS EXCITES ME THE MOST. THE WORLD CHANGES A LOT WHEN, NO MATTER WHERE YOU ARE - IN THE MIDDLE OF A DESERTED HIGHWAY OR IN A BUSTLING CITY - YOU CAN GET HIGH SPEED BROADBAND ACCESS.”

~ MATT MULLENWEG - AMERICAN ENTREPRENEUR AND WEB DEVELOPER; FOUNDING DEVELOPER OF WORDPRESS

Definitions

ISP = Internet Service Provider (a vendor/provider of your internet service)

The type of connection (i.e. cable, DSL, fiber, wireless) plays a role in determining how reliable and fast your speeds can be.

Downstream Speed = refers to data sent from a network service provider to a customer

Upstream Speed = refers to direction which data can be transferred from a client to a server

**Advertised speeds are typically in ranges, not guaranteed*

Asymmetric = Upstream data rate is slower than downstream rate

Symmetric = Identical upstream and downstream speeds

“THE RISE OF BROADBAND AND GROWING UBIQUITY OF INTERNET ACCESS EXCITES ME THE MOST. THE WORLD CHANGES A LOT WHEN, NO MATTER WHERE YOU ARE - IN THE MIDDLE OF A DESERTED HIGHWAY OR IN A BUSTLING CITY - YOU CAN GET HIGH SPEED BROADBAND ACCESS.”

~ MATT MULLENWEG - AMERICAN ENTREPRENEUR AND WEB DEVELOPER; FOUNDING DEVELOPER OF WORDPRESS

SCKLS Public Libraries Internet Connections and Speeds

This is our first comprehensive SCKLS region broadband study and we will continue to provide an annual update in January. While the first study is aimed at public libraries in our region we are considering adding academic, school and special libraries to next years study.

“To build up a library is to create a life. It’s never just a random collection of books.”

~ Carlos María Domínguez, Argentine writer and journalist – from the book, *The House of Paper*

Before we continue, I’d like to thank all of our member librarians who provided data for this report and Stefanie Gostautas, Technology Projects Specialist for all of her work on designing the following web page layout.

Now, let’s take a look at our findings in more detail.

<https://www.sckls.info/isp>

“WE ARE SEEING THE BEGINNING OF THINGS. WEB 2.0 IS BROADBAND. WEB 3.0 IS 10 GIGABITS A SECOND.”

~ REED HASTINGS - CO-FOUNDER, AND EXECUTIVE CHAIRMAN OF NETFLIX, INC.

Internet Service Providers Across All Service Levels

Internet Service Providers for Gateway Libraries

Internet Service Providers for Linking Libraries

Internet Service Providers for Service Center I Libraries

Internet Service Providers for Service Center II Libraries

Internet Service Providers for Major Service Center I Libraries

Internet Service Providers for Major Service Center II Libraries

Internet Service Providers for Major Resource Center Libraries

Type of Internet Connection Across All Service Levels

Types of Connections - Gateway Libraries

Types of Connections - Linking Libraries

Types of Connections - Service Center I Libraries

Types of Connections - Service Center II Libraries

Types of Connections - Major Service Center I Libraries

Types of Connections - Major Service Center II Libraries

Types of Connections - Major Resource Center Libraries

Average Internet Speeds for SCKLS Public Libraries, Across Service Levels

	All Service Levels	Gateway	Linking	Service Center I	Service Center II	Major Service Center I	Major Service Center II	Major Resource Center	Major Resource Center - Branch
■ Average Downstream Speed, Mbps	233	142	162	233	242	134	525	1000	500
■ Average Upstream Speed, Mbps	145	108	98	124	104	57	75	1000	500
